引文與參考書目

Introduction

Citation-引文(註)

According to traditional Chinese medicine, the pericardial meridian is associated with the pain or fullness in the chest, palpitations, depression, restlessness, manic or depressive disorders, nausea or vomiting, hiccup, gastric pain, and distension in the upper abdomen (Bai and Baron, 2001). Since the parasympathetic modulation of both heart and gut is largely mediated by the vagus nerve, and since vagal stimulation of the gut can result in increased peristalsis while the vagal stimulation of the heart can result in decreased heart rate (Guyton and Hall, 1996), it is speculated that to some extent the pericardium meridian might be associated with the autonomic nervous modulation of the subject.

Acupuncture or acupressure at the Neiguan (P6) point, the most frequently used acupoint in the pericardium meridian, has been shown to lessen nausea and vomiting (Dundee *et al.*, 1987, 1988, 1989a and b; Ho *et al.*, 1989; De Aloysio and Penacchioni, 1992; Belluomini *et al.*, 1994; Fan *et al.*, 1997; Harmon *et al.*, 2000). Because nausea and vomiting are also related to autonomic nervous activity (Morrow *et al.*, 1992; Morrow *et al.*, 1999), we speculated that the autonomic nervous activity might be changed when acupoint P6 point was performed.

Heart rate variability analysis is a useful non-invasive method for the assessment of autonomic nervous modulation of heart rate. Some diseases are associated with decreased vagal modulation, and the restoration of vagal modulation is associated with the improvement

Windows 介面設計

The screenshot displays the SRIS Windows application interface. The top menu bar includes 'File', 'Edit', 'References', 'Groups', 'Tags', 'Library', 'Tools', 'Window', and 'Help'. The left sidebar contains a '總功能' (Main Functions) section with options like 'Sync Configuration', 'All References' (11), 'Recently Added', 'Unfiled' (1), 'Trash', 'MY GROUPS' (expanded to show 'AI' with 'PubMed' (10)), 'MY TAGS' (+), 'FIND FULL TEXT', 'GROUPS SHARED BY O...', and 'ONLINE SEARCH' (+) with 'Jisc Library Hub Discover'. A purple callout box on the left states: '同步參考文獻分類群組 找全文狀態 連線資料庫檢索 搜尋 Group'. The main area shows 'All References' with a search bar and 'Library 中搜尋' (Search in Library) button. Below this is a table of 11 references. A purple callout box above the table says '快捷鍵' (Shortcuts) and lists icons for various actions. A purple callout box at the bottom center says '書目資料' (Bibliography Data). The right pane shows a detailed view of a reference: 'Anomitri, 2017 #5' with tabs for 'Summary', 'Edit', and 'PDF'. It includes an 'Attach file' button, the title 'Asperger syndrome and schizophrenia: Neurodevelopmental continuum or separated clinical entities?', authors 'C. Anomitri and H. Lazaratou', journal 'Psychiatriki 2017 Vol. 28 Issue 2 Pages 175-182', and accession number '28686564 DOI: 10.22365/jpsych.2017.282.175'. A purple callout box on the right says '詳細書目資料、編輯、PDF預覽' (Detailed bibliography data, editing, PDF preview). Below this is a '書目格式預覽' (Bibliography format preview) section showing the citation in a specific format.

Anomitri, C. and H. Lazaratou (2017). "Asperger syndrome and schizophrenia: Neurodevelopmental continuum or separated clinical entities?" *Psychiatriki* **28**(2): 175-182.

This article is an overview of the literature on Asperger's syndrome and schizophrenia and aim to discuss their similarities and differences. Eugen Bleuler who associated the terms "schizophrenia" and "autism" a century ago, viewed autism as a form of solitude of schizophrenic patients representing withdrawal from reality. Ever since, there has been confusion as to the boundaries between these conditions. Nowadays recent research, from a variety of perspectives-

A Case Series of Children With 2019 Novel Coronavirus Infection: Clinical and Epidemiological Features

J. H. Cai, J. Xu, D. J. Lin, Z. Yang, L. Xu, Z. H. Qu, et al.

Clinical Infectious Diseases 2020 Vol. 71 Issue 6 Pages 1547-1551

Accession Number: WOS:000582709700030 DOI: 10.1093/cid/ciaa198

We first described the 2019 novel coronavirus infection in 10 children occurring in areas other than Wuhan. The coronavirus diseases in children are usually mild and epidemiological exposure is a key clue to recognize pediatric case. Prolonged virus shedding is observed in respiratory tract and feces at the convalescent stage.

Haller, E. and T. Rebedea (2013). Designing a Chat-bot that Simulates an Historical Figure. 19th International Conference on Control Systems and Computer Science, Bucharest, ROMANIA, Ieee Computer Soc.

There are many applications that are incorporating a human appearance and intending to simulate human dialog, but in most of the cases the knowledge of the conversational bot is stored in a database created by a human experts. However, very few researches have investigated the idea of creating a chat-bot with an artificial character and personality starting from web pages or plain text about a certain person. This paper

Output Formats with Corresponding Import Options

To import references, you must first save references from an information provider as a plain text (.txt) file in a tagged format. If references are sent to you in the body of an email, save the email to a plain text file for importing.

1. In EndNote, select the File > Import > File option to select the tagged text file that you saved from the information provider.
2. Select the appropriate import filter from the Import Filter menu. The Other Filters option opens a dialog that displays all filters in the EndNote product. All filters direct tagged bits of bibliographic information to corresponding EndNote fields.
3. Start the import process by clicking the Import button.

The list below provides a direct export of references to EndNote. It is only a small list of information providers. Note the following before you begin.

- There are hundreds of import filters available in the EndNote Filters folder.
- Select Edit > Import Filters > Open Filter Manager to look into the EndNote Import Filters table for information on how to open, view, and edit filters. Many of the filters include a Comments and Limitations section with tips on how to download references for importing into EndNote.
- Go to our Web site at <http://www.endnote.com/support/enfilters.asp> for updated information and import filters, including detailed information on how to save and download data directly to EndNote.

See [Importing Reference Data into EndNote](#) for more detailed information about importing.

See [General Importing Instructions](#) for more step-by-step instructions.

Information Provider	Recommended Download Format	Import Filter
AARP AgeLine	http://research.aarp.org/ageline/home.html There is no method for downloading data from this database. Instead, save the results screen as a plain text file with your web browser's Save command. The resulting text file contains tags which are preceded by 18 spaces.	Ageline (AARP) filter
ACM Digital Library (Association for Computing Machinery)	Users with subscription access to this web site can save multiple records to a BINDER. Once saved, you can export the records in an EndNote format. Non-subscribers can download one record at a time: 1. Create a search. 2. Click on an article. 3. Scroll half-way down the page and select DISPLAY EndNote.	EndNote Import

%J 理論與改革

%K 人工智能;元數據;數碼環境;數碼物;哲學敘事;算法

%X 人工智能時代,元數據是我們繞不開的社會歷史存在,其以技術邏輯通過規則的具象生成、客觀創設與遷移拓展具體影響著人類生存與生活的邏輯。元數據作為判定原則、推理規範和預測根據,既表達數據的特質,又規定了系統生成和識、創設對象和提升智能的邏輯。從元數據的生成邏輯來講,人工智能生成元數據,使人工智能以區別人類智能的方式技術性地再現了智能的運行過程及其對對象的“認知”;從元數據的社會歷史效應來看,元數據作為人工智能以數據為對象確立規則的原則與邏輯,既復現了客觀存在的關係,又以數碼的方式泛化了智能系統發現的規則,從而變革了的人類主體與對象世界之間的互動關係與影響邏輯。因此,面對人工智能定義歷史的現實,我們只有從人工智能生成元數據的邏輯出發,直面人工智能時代數據與物的轉換邏輯;重釋數據網絡中的主體與客體關係;探尋現實世界與可能世界的因果聯結,才能有效統合客觀世界的生成與實踐世界的創造;推進智能本質的認知與智能能力的發展;實現“人—機”的共在與“虛—實”的結合。

Chatbots for future docs: exploring medical students' attitudes and knowledge towards artificial intelligence and medical chatbots

Julia-Astrid Mohdt , Teresa Feszl-Wietek , Amir Madany Mamlouk , Kay Nieselt , Wolfgang Fuhr and Anne Hermiane-Werner

^aUniversity of Tübingen, Tübingen, Germany; ^bInstitute for Neuro- and Bioinformatics, University of Luebeck, Luebeck, Germany; ^cInstitute for Bioinformatics and Medical Informatics, University of Tübingen, Germany; ^dDepartment of Internal Medicine W Psychosomatic Medicine and Psychotherapy, University Hospital Tübingen, Tübingen, Germany

ABSTRACT

Artificial intelligence (AI) in medicine and digital assistance systems such as chatbots will play an increasingly important role in future doctor – patient communication. To benefit from the potential of this technical innovation and ensure optimal patient care, future physicians should be equipped with the appropriate skills. Accordingly, a suitable place for the management and adoption of digital assistance systems must be found in the medical education curriculum. To determine the existing levels of knowledge of medical students about AI chatbots in particular in the healthcare setting, this study surveyed medical students of the University of Luebeck and the University Hospital of Tübingen. Using standardized quantitative questionnaires and qualitative analysis of group discussions, the attitudes of medical students toward AI and chatbots in medicine were investigated. From this, relevant requirements for the future integration of AI into the medical curriculum could be identified. The aim was to establish a basic understanding of the opportunities, limitations, and risks, as well as potential areas of application of the technology. The participants ($N=12$) were able to develop an understanding of how AI and chatbots will affect their future daily work. Although basic attitudes toward the use of AI were positive, the students also expressed concerns. There was high levels of agreement regarding the use of AI in administrative settings (83.3%) and research with health-related data (91.7%). However, participants expressed concerns that data protection may be insufficiently guaranteed (58.3%) and that they might be increasingly monitored at work in the future (58.3%). The evaluations indicated that future physicians want to engage more intensively with AI in medicine. In view of future developments, AI and data competencies should be taught in a structured way during the medical curriculum and integrated into curricular teaching.

ARTICLE HISTORY

Received 15 December 2022

Introduction

The healthcare system is undergoing a digital transformation, and artificial intelligence (AI) will play a significant role in defining everyday medical practice [1]. The location- and time-independence of digital applications have created new opportunities for medicine and health communication that are also changing the doctor – patient relationship [2]. The growing importance of e-health applications, wearables and AI applications such as chatbots can empower patients to collect their own health data [3,4].

Furthermore, the digital networking of patients, hospitals, physicians and other healthcare services is enabling a shift from a physician-centric approach to more patient-centered treatment [5]. To exploit the potential of this technical innovation and ensure optimized care for patients, future doctors must be equipped with the appropriate skills [6]. Future physicians will not only need to be flexible in responding to different healthcare contexts but will also require

the competence to adequately deal with procedures and applications involving AI and the accompanying big data [7]. The growing complexity of medicine and increasing specialization of knowledge require the integration of AI as well as the interaction with digital assistance systems already in the curriculum of medical studies [8–10]. According to current literature, although AI competencies are essential for medical practice, they are not comprehensively taught in medical education [7,11,12].

Medical curriculum in Germany

A look at the national competence-based learning objectives catalog for medicine (NEKLM) [13] shows that the teaching of competencies in the area of medical apps and artificial intelligence is still under-represented. The national competence-based learning objectives catalog for medicine is currently being further developed on the basis of the 'Master Plan

Accession Number: 30467930 DOI: 10.1111/brv.12480

<https://www.ncbi.nlm.nih.gov/pubmed/30467930>

In the 12 years since Dudgeon et al. (2006) reviewed major pressures on freshwater ecosystems, the biodiversity crisis in the world's lakes, reservoirs, rivers, streams and wetlands has deepened. While lakes, reservoirs and rivers cover only 2.3% of the Earth's surface, these ecosystems host at least 9.5% of

自行鍵入與夾帶檔案

資料匯入 – 自行鍵入

自行鍵入要注意：

1. 文獻類型[Reference Type]要選擇正確。
2. 一位作者一行，每位作者皆獨立一行。
3. 當以英文輸入時，作者姓氏在前要加逗點，如：Wang, Da Min；姓氏在後不用加逗點。同篇書目資料請統一格式。
4. 單位英文後方請加上「,」符號，如：「Ministry of Health and Welfare,」

管理書目資料 – Groups

使用者可以透過 EndNote Library 中的 Groups 功能，**分類管理**個人 EndNote Library 中的書目資料。

Groups 的三種型態

▼ MY GROUPS		
 3D Printing		3
 Deep Learning		3
▼ Coronavirus		
 Covid-19		14
 SARS		12
▼ Year		
 2020		2
 2021		18
 About 2020~2021		20

Group (一般群組):
使用者自訂分類。

Smart Group (智慧群組):
使用者訂下篩選條件，符合的文獻資料自動進入該群組。

From Groups (集合群組):
利用現用群組進行交集、聯集或是排除而產生的群組分類。

Chatbots in healthcare

Artificial intelligence (AI) in medicine and digital assistance systems such as chatbots will play an increasingly important role in future doctor – patient communication [1-3]. To benefit from the potential of this technical innovation and ensure optimal patient care, future physicians should be equipped with the appropriate skills. Accordingly, a suitable place for the management and adaptation of digital assistance systems must be found in the medical education curriculum.

Artificial intelligence is an increasingly important part of the medical profession. From the potential of telemedicine to the use of artificial intelligence in the management of chronic diseases, the medical education curriculum must be updated to reflect the latest research and technology. 1. Chatbots in healthcare

Artificial intelligence (AI) in medicine and digital assistance systems such as chatbots will play an increasingly important role in future doctor – patient communication ¹⁻³. To benefit from the potential of this technical innovation and ensure optimal patient care, future physicians should be equipped with the appropriate skills. Accordingly, a suitable place for the management and adaptation of digital assistance systems must be found in the medical education curriculum^{4,5}.

Knowledge and practice and attitude toward cupping therapy among physicians in Sheikh Khalifa medical city

M. Al Zaabi, E. Al Zuraiqi, J. Al Dhanhani, M. Al Yammahi, M. Al Teniji and E. Darwish

J Family Med Prim Care 2023 Vol. 12 Issue 5 Pages 979-985

Accession Number: 37448936 PMCID: PMC10336941 DOI: 10.4103/ijfmpc.jfmpc_1825_22

ID: Complementary medicine (CM) is gaining popularity worldwide. According to the 2019 World Health Organization global report on traditional and complementary medicine (T&CM), 80% of member states acknowledged practicing T&CM. In the United Arab Emirates, T&CM practice prevalence in 2012 was 20-39%. These trends highlight physicians' need for knowledge on CM, such as cupping therapy. OBJECTIVE: This study aims to assess knowledge, practice, and attitude toward cupping therapy (CT) among physicians in Sheikh Khalifa medical city (SKMC). METHODOLOGY: A cross-sectional study was conducted from September 2020 to March 2021 among the physicians of

下午12:00 (0 分鐘前)

  would like to share an EndNote library with you.

To accept this invitation and access Jamie 's library, you must have EndNote X7.2 or later installed, and we strongly recommend using EndNote 20 for the best experience.

Once you've accepted this invitation, you will be able to access all of the references, PDFs, file attachments, and notes in this shared library from your EndNote desktop application.

Accept: <https://account.endnote.com/enwservices/invitation/#/f252b9dd-2e25-4640-8443-10dfc69ff700>

Don't have EndNote for desktop? Download the free trial version now to access shared libraries and much more. http://endnote.com/buy?utm_source=en-desktop&utm_medium=email&utm_campaign=ls-email-ro&utm_content=buy-en

透過連結進入

Learn more about sharing your research with EndNote. http://endnote.com/?utm_source=en-desktop&utm_medium=edm&utm_campaign=ls-email-ro&utm_content=learn-more

If you do not wish to accept this invitation, please notify  directly.

Jamie has invited you to join a shared
EndNote library.

[Learn More](#)

To accept this invitation, sign in using the same credentials you use when accessing EndNote online or syncing your desktop library, or create a new account. To access this shared library you must have EndNote X7.2 or later installed.

Sign In with your EndNote account

登入EndNote Online帳密

OR

完成邀請接受，即可使用

Invitation accepted. For access to Jamie's shared EndNote library, follow these instructions.

Share Library 使用方式

Update EndNote to version X7.2 or later

Now, go to the desktop to make sure you're on the latest version. To check:

Windows

1. Click on **Help > About**
2. Click on **Program Updates** or download the [installer](#).

You can now access the shared library from your desktop.
Just go to File > Open Shared Library.

OS X

1. Click on the **EndNote** menu dropdown.
2. Click on **Check for Updates** or download the [installer](#).

You can now access the shared library from your desktop.
Just go to File > Open Shared Library.

EndNote Web 如何同步 Library ?

The screenshot displays the EndNote 21 application window titled "EndNote 21 - Jamie.enl". The menu bar includes File, Edit, References, Groups, Tags, Library, Tools, Window, and Help. The left sidebar shows a tree view with categories like All References (165), Recently Added, Unfiled (46), Trash (2), MY GROUPS (My Groups, Full Text (9), Database (1.Cochrane Library (10), 2.Pubmed (10), 3.Web of Science (90)), MY TAGS (Article (4), Review (3), 已引用 (4), 待查證 (9)), FIND FULL TEXT, GROUPS SHARED BY OTH..., and ONLINE SEARCH (Jisc Library Hub Discover, Library of Congress, ProQuest, Pub Med (NLM)).

The main pane is titled "Sync Configuration" and contains a "Sync Now" button and a "Refresh Status" link. Below this, a message states: "Synchronize your data with your endnote account to keep your library in sync and collaborate with colleagues".

An "EndNote Login" dialog box is open in the foreground. It contains the following elements:

- A header "EndNote Login" with a close button (X).
- Text: "Using an EndNote account makes it easy to get the latest features and keep your library in sync. [Learn more](#)".
- A section titled "Create a new EndNote Account" with the text: "If you don't have an EndNote account or aren't sure, then click Sign Up." and a "Sign Up" button. A purple callout bubble with the text "註冊" (Register) points to the "Sign Up" button.
- A section titled "EndNote Account Credentials" with input fields for "E-mail" and "Password:". A purple callout bubble with the text "登入" (Login) points to the "Password:" field.
- A link for "[Forgot Password](#)".
- "OK" and "Cancel" buttons at the bottom.

At the bottom of the EndNote window, there is a search bar labeled "Search for group" and a magnifying glass icon.
